PROGRAMMING PARADIGMS

PROCEDURAL PROGRAMMING

OBJECT ORIENTED PROGRAMMING

FUNCTIONAL PROGRAMMING

I am a junior front end developer based in the Bay Area, CA. I completed the full stack coding boot camp cohort at UC Berkeley Extension Coding Boot Camp this year. I am seeking a role as a front end developer to contribute to building functional and stunning UI's and continuing to learn more about web development.

WORK EXPERIENCE

POLLY MARTINI EVENTS

2019 - PRESENT

Polly Martini Events provides bartending services for various private events.

EQIS

2015 - 2018

EQIS is an investing platform where I worked in the Operations department. I worked in every sub-department including client onboarding, transfer specialization of funds, maintaining requests and my final role with the company was a portfolio administrator in the trading department.

PROJECTS

RUBBISH

JAN 2019

Rubbish is an on demand neighborhood garbage service where homeowners can request when they need their disposal bins taken out on trash days. My role was building the front end UI in React, CSS3 and organizing the client side structure.

SOMA

DEC 2018

Soma is a social music platform that allows users to review concerts attended and save upcoming shows to your profile for review. My role was the backend, building the server in Express, templating routes in Handlebars, creating user Schema with Sequelize and MySQL, user authentication with Passport, integrating Spotify & Bands in Town API with our API.

U-PICK

NOV 2018

uPick is an app that assists indecisive users decide on a place to eat by narrowing down their selections by cuisines and also by restaurants, which will also give the user details of the restaurant, such as addresses, ratings, and price range to further assist with their decision. My role was building the UI and front end functionality for displaying/removing content based on user interactions.

EDUCATION

FULL STACK WEB DEVELOPER

2018 - 2019

UC Berkeley Extension Coding Bootcamp

12 week bootcamp with focus on full stack web development. Technologies used but not limited to, HTML5, CSS3, Bootstrap, jQuery, React, NodeJS, Express, Handlebars, MySQL, MongoDB, Sequelize, Passport, Git, Heroku.
